Science Lesson Focus**

<b>SEMESTER 1</b>				
<b>Theme : Diversity</b>				
<b>Chapter 1 Classifying Living and Non-Living Things</b>	<b>Chapter 2 Plants</b>	<b>Chapter 3 Animals</b>	<b>Chapter 4 Fungi and Bacteria</b>	<b>Chapter 5 Exploring Materials</b>
<p>Describe the characteristics of living things.</p> <p>Classify living things into broad groups based on similarities and differences of common observable characteristics.</p>	<p>Recognise that plants are living things.</p> <p>Classify plants into flowering and non-flowering plants.</p> <p>Identify and describe the roots, stems, leaves, flowers and fruits of some plants.</p>	<p>Recognise some broad groups of living things:</p> <p>-amphibians, birds, fish, insects, mammals, reptiles)</p> <p>State and describe the characteristics of some groups of animals (insects, mammals and reptiles).</p>	<p>Recognise some broad groups of living things:</p> <p>- fungi (mould, mushroom, yeast) - bacteria</p> <p>Describe the characteristics of fungi.</p> <p>Recognise that fungi come in various sizes.</p> <p>State how some fungi are useful, while others are harmful, how fungi obtain food, where fungi can be found and how fungi reproduce. Describe the characteristics of bacteria.</p>	<p>Relate the use of various types of materials (ceramic, fabric, glass, metal, plastics, rubber, wood) to their physical properties.</p> <p>Recognise that objects can be classified based on the materials they are made of.</p> <p>State the different properties of materials and the ways to test the properties of materials.</p> <p>Compare materials based on their physical properties.</p>

			<p>Recognise that bacteria are microorganisms.</p> <p>State how some bacteria are useful, while others are harmful, where bacteria are found and how bacteria obtain food.</p>	<p>Observe a material and describe its properties.</p>
